SMART DEVICE APPLICATION

This micro power checker communicates with the smart device via Bluetooth. Its straightforward and free smart applications make the operation of this instrument really simple. Data can be saved directly into the smart device for seamless sharing via text and emails.

Key features of the app:

- › Supports Duplex measurements storing values on the transmit (Tx) and receive (Rx) side on the same window and in the same report
- › Possibility to add GPS coordinates to measurement data to easily track measurement sites
- › Export of the results in .JSON format making it easy to integrate in data management systems. PDF format also supported.

The application is available for iOS and Android devices via the App Store and Google Play.
